Pomona

The Pomona school opens today with Miss Dora Hamby as teacher. Miss Hamby taught a successful term here last year; and it is hoped she will receive the full co-operation of the parents in seeing that the children attend regularly. No matter how efficient the teacher may be, he can not give very much to the child who attends only two or three days in the week. It is hard to believe that the man or woman lives today who feels that a good education is not essential to their child's progress, whether his future lies on a plateau farm or in the rush of the business world; and yet there are many children in the county who are not given even the advantage of the brief terms that we are granted in our country schools.

Mrs. David Fleming left Wednesday to join her husband in Knoxville, where they will make their future home.

A large crowd attended the interesting and inspiring talk by Rev. Henry Blue, at the Clayville church Sunday.

Charles Cox has bought the Tom Bright place and will take possession in the fall.

Miss Ida Dayton, daughter of Mr. and Mrs. James Dayton, and Philip Vanboy, of Crossville, were united in marriage by Judge G. P. Burnett at the bride's home Sunday. Miss Dayton is a sweet, lovable young lady who has many friends here to wish her much happiness in her new life.

A WOMAN'S KINDLY ACT.

Mrs. G. H. Eveland, Duncan Mills, Ill., writes: "I was stricken with lumbago, unable to turn in bed. A neighbor brought Foley Kidney Pills. She had been similarly afflicted and they cured her. I was cured by three bottles." If the kidneys do not function, lumbago, rheumatism, aches, pains, are apt to result. For sale by Reed & Burnett.

MAKING CHOICE OF HUSBAND

Methods Vary in Different Communities—Peculiar Custom That Has Long Prevailed in Russia.

To ninety-nine girls out of a hundred the most important duty in life is choosing a husband. Methods of choice vary a good deal, of course, chiefly perhaps as between town and country-bred maidens.

To the town or suburban girl a man's clothes count almost for everything. The bride is to the best dressed. The cut of a coat or the color of a cravat weighs more with Clara than character.

Her country cousin, on the other hand, knows better than to pin her faith to a tailor's dummy. She is guided in her choice by more occult signs. By agitating with her hand the water in a bucket she can see the image of her future spouse. If she desires confirmation she has only to throw broken eggs over a friend's head and the same image will appear.

The peasant girls of Russia arrive at a similar result by seating themselves in front of a small looking-glass in a semidark room, when a vision of their future lord and master will be certain to present itself.

Once a year an exceptional opportunity occurs. At 12 o'clock Christmas eve every girl who can contrive to steal out in order to ask the first man she meets his name. Whatever he gives is that of the bridegroom-to-be.—Exchange.

Skunk All Right at a Distance.

The polecat, or skunk, is a playful, affectionate little creature, with beautiful black and white fur, an inquisitive disposition and a superabundance of animal spirits. Its hide is valued for its fine fur; its fat for a kind of grease well known in rural districts, and its two glands secrete what is known as civet oil. Civet oil, in its cultivated state, is used as a "fixer" for delicate perfumes. In its natural state civet oil is a perfume that would scarcely be called delicate. In fact, it is about the most undelicate perfume imaginable, as anybody can testify who has encountered it unexpectedly at first hand.

Why Jupiter Is Wearing Belts.

It has been suggested by Lau that the reason Jupiter has belts instead of zones of spots is to be found in its rapid rotation, the material forced upward from the lower strata of the planet, bringing with it a smaller lineal velocity than that of the surface, streams eastward, assuming the look of elongated streaks.

If the centers of eruption are sufficiently numerous, belts are formed; and it is suggested that, were the sun's rotation much more rapid than it is, the solar surface at spot maximum would also present dark streaks.

Has Twins Three Times.

Mrs. Frank E. Walter, wife of a local cement contractor, has presented to her husband twins, both boys, and there are now six twin boys in the family. Two, Paul and Joseph, are three years old and the next two, Leon and Carl, eighteen months old.

That twins should be born into a family three times consecutively in such a brief space of time is considered remarkable. The family now consists of twelve children.

Catless World in 1920?

With the slogan "Song birds forever and a catless world in 1920," R. Sayre, one of the largest individual farm owners in North Dakota, has arrived from Chicago to look after his interests, which surround Devil's Lake, says a Devil's Lake (N. D.) dispatch.

In a leaflet issued by the enemy of the cat the household pet is pictured as the most vicious, disease-carrying, germ-ridden animal in the world.

Truth Established.

Chity is preparing to build a "community" silo. It is very easy to see how the "community" can fill the silo, but not so easy to see how each contributing member is to get his proper part of the silage when the time comes for using it. The experiment will be watched with interest. If the movement wins on that basis it will present a knockdown argument in favor of individual silos. After all there is no argument necessary on the silo question for that has long since been settled as one of the best and cheapest methods of furnishing feed for cattle. The main trouble seems to be to get the individual sufficiently enthused over the idea to induce him to put the necessary capital into it.
